

Why Reclaimed Timbers

Thanks to a century or so of drying, and the inherent tight grain of old trees, reclaimed timbers allow for stable joinery and unmatched history. Their character is celebrated with hints of the past, ranging from bolt holes and ferrous staining, to original as-found surfaces and the occasional mortise pocket.

We do well when we do good

Pioneer Millworks operates on the triple bottom line—a simple belief that People, Planet, and Profit work together to ensure a better future. We strive to keep our carbon footprint small; our roofs house 100kW Solar arrays and our wood scraps keep us warm. Sales from some of our products support historic preservation and conservation, among our other ecological and social efforts. Our products are FSC-certified, LEED point eligible, and in many cases diverted from landfills. Your purchases are what make this crazy ride possible,

thank you.

Serving great clients across the nation from OR & NY.

Industrial Timbers

Sourced from the factories our country was built on, Industrial Salvaged timbers often have a more uniform patina with band sawn, circle sawn, or planed surfaces. Signs of an industrious life are often revealed: original bolt holes, nail holes, fastener marks, ferrous staining, checking, occasional knots, and others.

Typical Species:

Heart Pine, Douglas fir, Yellow Pine, Hemlock, Eastern White Pine, Red Pine, and Oak (less frequently).

As-Found

Resawn & Planed

Agricultural Timbers

Antique agricultural timbers are reclaimed from a variety of barns, granaries, storage buildings, and other rural structures. They can be as challenging as they are extraordinary. In addition to their hand-hewn or sawn surfaces, they often have original mortise pockets, tenons, peg holes, insect marks, checking, and knots.

Typical Species:

Ash, Elm, Maple, Beech, Hickory, Oak, White Pine, Hemlock, and Douglas fir.

Hand-Hewn Agricultural Timbers Come in Various Tones and Textures

Surfaces

Our custom milling can provide you with smooth S4S faces, band sawn, or in some cases circular sawn surfaces for any of our reclaimed timbers. While surfaces will be cleaner, character including bolt holes, nail holes, bug holes, ferrous staining, checking, and other marks will remain visible. Our mills in NY and OR offer mitered box beams, jacket boards, applied hewing, other textures, and many color options.
